The games.

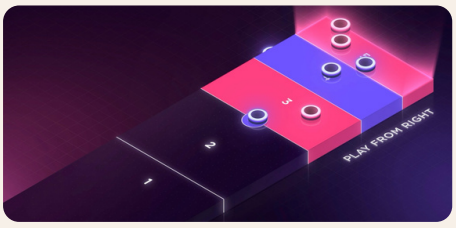

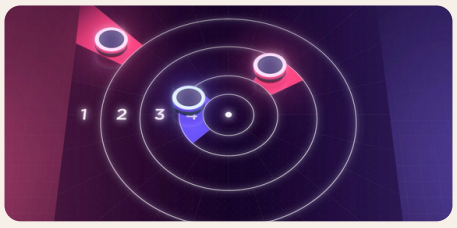

Our modern version of the classic shuffle. All the pucks on the table count, and the team with the most points wins a round.

All the pucks on the table count, but you only get the points if you are the first to conquer the zone, or have more pucks than the opponent in the zone.

The closest you'll get to curling without freezing. Place the pucks as close to the center of the target area as possible to get the most points.
